

Magnetic Actuator

MA-2S

For extended sensing with ES Series Proximity Switches

The Euroswitch ES Series proximity switches use a “Hermetically Sealed Reed Element”. Reed switches are electromechanical devices that detect the position of a magnetic field; therefore, they require an external magnetic actuator to operate. Detailed below are our standard range of magnets designed to give solutions to a multitude of applications.

MA-2S Specifications

Max Sensing Range	6mm (0.24")
Body Material	316L Stainless Steel
Dimensions	35mm x16mm x 13mm
Mounting	x2 3mm Through Holes

Operating Principles

To obtain the best results possible in your application, certain consideration should be observed.

Here are the two most typical examples of how the target would approach the ES Series Sensor.
