**MA-7S / MA-7N**

**For extended sensing with ES Series Proximity Switches**

The Euroswitch ES Series proximity switches use a “Hermetically Sealed Reed Element”. Reed switches are electromechanical devices that detect the position of a magnetic field; therefore, they require an external magnetic actuator to operate. Detailed below are our standard range of magnets designed to give solutions to a multitude of applications.

**MA-7S Specifications**

Max Sensing Range	20mm (0.79")	20mm (0.79")
Body Material	316L Stainless Steel	316L Stainless Steel
Dimensions	Ø 22mm x 26mm	Ø 0.87" x .02"
Mounting	M10x1.5 x 16mm	3/8"-16 x 0.63"

**Operating Principles**

To obtain the best results possible in your application, certain consideration should be observed.

Here are the two most typical examples of how the target would approach the ES Series Sensor.
